## SR-91 Westbound & Eastbound Lane Widening Project

# ! Noise Alert !

## Slope Removal at Imperial Highway Bridge

### Project Overview

Caltrans and OCTA are adding a new six-mile lane in both the westbound and eastbound direction of SR-91 from approximately SR-55 to SR-241. The project will benefit commuters by increasing capacity, improving operations and relieving congestion, as well as delivering a better drive through Anaheim and Yorba Linda.

**What:** Construction crews will begin the removal of existing slope pavement at the Imperial Highway bridge, which may result in loud noise during overnight work hours. To safely and efficiently conduct the work, nighttime closure of the outside lanes under the Imperial Highway bridge may be required. No detour is necessary as at least one lane will remain open at all times.

**When:** Scheduled from Monday, December 19 through Friday, December 23 from 11:59 p.m. to 4 a.m. nightly

### Maximizing Safety, Maximizing Signage, Maximizing Traffic Flow

Imperial Highway will be clearly marked with electronic signage directing motorists to merge into the open lanes. While delays may occur, no detour is necessary because at least two lanes will be open in both directions throughout the work period.

### Safety Reminder

As a reminder, California law requires vehicles to safely reduce speed, move over and merge into unoccupied lanes when emergency vehicles, construction vehicles, or tow trucks are displaying flashing warning lights. OCTA and Caltrans remind motorists to use extra caution and reduce speeds when driving through construction zones.
